

Josiah Myhre

(612) 599-2374 | Dallas, TX | josiah.myhre@gmail.com | [LinkedIn](#) | josiahmyhre.com

Mechanical engineering graduate with Engineer in Training (EIT) certification application in progress, and over 12 years of experience in product configuration, manufacturing support, fixture design, documentation, and process improvement seeking permanent full-time employment as an engineer.

Education

The University of Texas at Dallas – B.S. in Mechanical Engineering, Cum Laude (3.79 GPA) August 2026
Winona State University – B.A. in Social Work 2010

Certifications

EIT certification application submitted August 2026
Fundamentals of Engineering (FE) Mechanical Exam – Passed (Jan 2026)

Work Experience

Ergomart – Dallas, TX

Position Held: Engineering Support Specialist Jan 2025 – Present

- Support manufacturing and production-readiness improvements by identifying shop-floor issues and working with engineering and production to implement corrective actions
- Design and implement custom jigs and fixtures to improve manufacturing repeatability, assembly accuracy, and production consistency
- Create technical documentation, assembly instructions, and installation guides to support accurate production and field deployment

Position Held: Customer Service and Sales Manager Sept 2017 – Jan 2025

- Led cross-functional coordination between sales, engineering, production, and shipping to improve order accuracy and workflow consistency
- Served as a technical interface between customers, engineering, and production, translating requirements into appropriate product configurations
- Identified recurring quality, documentation, and execution issues and worked with engineering and production to implement corrective actions
- Coordinated with vendors and purchasing to resolve component availability and specification issues to meet customer due dates

Position Held: Assembly Team Lead Sept 2013 – Sept 2017

- Implemented a formal inventory and part-tracking system by organizing components and coordinating ERP workflows for production operations
- Represented the assembly team in design reviews, providing DFM and DFA feedback to improve manufacturability and ease of assembly.
- Ensured assemblies met quality, schedule, documentation, and production requirements

Engineering Club Experience

Mechanical Team Lead, UT Dallas Underwater Robotics Club (*Robosub*) Aug 2024 – Jun 2025

- Led mechanical design for a competition ROV
- Coordinated CAD design, manufacturing, assembly, and electrical/software integration.

Mechanical Team Member, UT Dallas Underwater Robotics Club (*Robosub*) Jan 2024 – May 2026

- Designed and fabricated: object manipulators, lidar gimbal, camera mounts, ROV chassis, controls enclosure

Skills

Design Tools: Creo, SolidWorks, Fusion, Blender

Manufacturing/Design: Jigs and fixtures, CAD drawings, BOM support, DFM, manual machining, FDM, resin casting

Tools/Analysis: Excel, NetSuite ERP, Jira, Notion, Google Workspace, MATLAB, Simulink, Mathcad
